Subject: RE: Chemours' response to our request to sample

Rick, I'm forwarding your message to Meg Keegan as she has taken over as the state program manager for West Virginia.

Subject: Chemours' response to our request to sample

Good morning,

I am sure you are aware that EPA Region 3 (with Region 5 involvement) sent a letter to Chemours requesting them to sample for GenX in a selected group of public and private water supplies in West Virginia and Ohio and that Chemours agreed to do the sampling. Since we were getting requests from press and other stakeholders in the area of Chemours' Washington Works Plant in WV on what Chemours' response was to our request, our public affairs folks arranged to post the response letter to one of the Agency's PFAS web pages. The response letter and our original request letter can be found at the following web page:

<https://www.epa.gov/pfas/request-sampling-genx-water-supplies>

When Chemours submits the results from this special sampling, we plan on posting the results to the same web page.

Please let me know if you have any questions.

Rick
